Office Suite	<div style="width: 30%;"></div>

Professional Skills

Highly passionate about art and foolish for drawing! I have 5 years of experience in freelance working as visual development artist and illustrator for books and various products for children. I started my education studying traditional art as paint and sculpture and then I delved my skills in digital techniques to be a professional illustrator and concept artist for the animation world, one of my passion since I was a child! Serious and determined, I love teamwork and learning everything that other people can teach me. I'm not afraid of hard work and I love to grow up facing new challenges. It gives me immense pleasure to test my creativity and push it to the limit! I love to experiment with different kind of techniques and design, and I know how to be versatile to preserving a production's aesthetic and style.
